
a
EEG memory task
old
new
old
delay
Study
view and remember
Test
old or new?
EEG recorded during both phases
Multivariate decoding
EEG pattern
50-ms window
28 channels
Item-level scores
H-ability or FA-ability
high / low labels
Train classifier
held-out decision values, d
low
high
Hyperplane contrast = d̄(high) − d̄(low)
Test on held-out data
tested on
trained on
